Dr. Justin Greco received his DVM from the University of California at Davis in 2002. He completed an internship at the University of Pennsylvania in 2003 and his residency at the Animal Medical Center in New York City in 2006. His professional interests include fracture healing, joint replacement and neurosurgery.

Dr. Daniel Hoffmann attended the University of Minnesota College of Veterinary Medicine, graduating Summa Cum Laude in 2004. He completed a surgical residency at The Ohio State University College of Veterinary Medicine, as well as internships at the Dallas Veterinary Surgical Center and at the Virginia-Maryland Regional College of Veterinary Medicine. His professional interests include pain management, physical rehabilitation, reconstructive and oncologic surgery, fracture healing, joint replacement and neurosurgery.

Dr. Max Bush attended the University of Pennsylvania School of Veterinary Medicine, graduating in 2011. He has completed an internship in small animal rotation at Angell Animal Medical Center in Boston and a surgical internship at Blue Pearl Veterinary Specialty and Emergency Center in Kansas City.

Robyn Woodward and Nikki Cioppa, the surgery service coordinators, handle phone calls when doctors are unavailable and schedule all re-check appointments.
### What separates us from the rest?

The surgery team at VSES has the advanced training, equipment and expertise to treat even the most complex surgical conditions.

The training and experience required to achieve specialist certification ensures the surgeon has the most current knowledge and techniques available.

As the only board-certified team of veterinary surgeons in Rochester, we are able to offer the highest level of surgical care without the need for extensive travel.

We look forward to working with you and your regular veterinarian to identify the surgical issue your pet is experiencing, and to offer various treatment options.

### What can I expect during my visit?

Initial consultations generally take one hour, but could take longer depending on how many diagnostics tests need to be performed, and the pet’s health during the appointment.

Consultations will include a discussion about the pet’s condition, options for further diagnostic tests and possible treatment plans.

Our surgeons review all records provided by the referring veterinarian before sending him/her the final assessment.

If surgery is recommended, an estimate for the surgery will be provided. This estimate covers a follow-up suture removal appointment, but does not cover any additional re-check appointments.

### What does the surgery service provide?

We provide diagnosis and treatment of a variety of surgical conditions in small companion animals. These procedures include, but are not limited to:

- Emergency surgery
- Minimally invasive surgery
- Neurosurgery
- Orthopedics
- Soft tissue surgery
- Surgical oncology
